

Table 7-5. Estimated total of capital project costs for projects to construct or repair/renovate science and engineering research facilities at predominantly undergraduate institutions¹: 1992-1993
[Current dollars in millions]

Predominantly undergraduate institutions	New construction costs	Repair/renovation costs	Total capital project costs
Total: All nondoctorates	92.3	34.5	126.8
Nondoctorate HBCUs ²	27.1	7.2	34.3
Predominantly undergraduate	65.2	27.2	92.4
Comprehensive universities	60.2	16.5	76.7
Liberal arts colleges	5	10.7	15.8

¹ The Carnegie Classification of Institutions of Higher Education is used to distinguish between two different groups of predominantly undergraduate institutions: colleges, those that offer a liberal arts program along with other programs such as engineering, business administration, or nursing; and liberal arts colleges, those award bachelor's degrees and that grant more than half of their degrees in the liberal arts.

² All nondoctorate HBCUs are included, not just those from the panel of 29. Therefore, results cannot be compared to those in Chapter 6.

NOTES: Because of rounding, components may not add to 100.

Dollar amounts are reported in current dollars, unadjusted for inflation. See table A-5 in the Technical Notes for the inflation adjustment used in Volume I of this report.

KEY: "HBCUs" = Historically Black Colleges and Universities
